

Greek Muses Channelings

Channeled by Marijana Gabrielsen

From Wikipedia:

"In ancient Greek religion and mythology, the Muses (Ancient Greek: Μοῦσαι, Moûsai) are the inspirational goddesses of literature, science, and the arts. They are considered the source of the knowledge embodied in the poetry, lyric songs, and myths that were related orally for centuries in these ancient cultures.

Greek Mousa is a common noun as well as a type of goddess: it literally means "art" or "poetry"."

Channeled message from Muse Thalia

"I come with the message of peace. A peace that is a state of mind, heart, and soul. I will not teach you how to find peace because everyone has his or her own way of finding peace. But peace in the soul is crucial for life. If you do not have peace, you can't live this Earthly life properly. Peace is when you reach God. How do you reach God? You reach God by connecting to God in many different ways. There are as many ways as there are people. So someone will search in religion, someone will search in a simple prayer, someone will search in meditation. It doesn't matter as long as your intention is pure and full of love.

God is always there, always for you. Don't doubt that. The only person who can disconnect you from God is you. And you are the one who connects to God also. But the trick is, the connection is always there, just you are not aware or you are aware of that connection. That is the little detail. Awareness or not being aware.

I would love to introduce you to a story. It is a story of a traveler, of a girl who was a traveler. She used to travel a lot. Traveling to all places possible, all the monasteries, all the temples to find peace. Wherever she went, she couldn't find peace. Something was missing. She was meditating with monks, she was praying with monks, she was doing everything possible but still, she couldn't find the inner peace. And then she said: "I can't find the peace, I'm lost, I give up, there is no way to find peace! There is no God." She gave up on life completely, on everything.

And then, what she did, she came back home. And she said: "You know what? I will dedicate this life to Earthly life, to be a good and honest person." And she started with daily activities, with everyday life, a bit disappointed, but she really was determined to live a better life than before the search for peace and God. But the thing is, the more she was doing the earthly jobs, and the more she was grounded, the more she was a better person, the more she was herself. She somehow at one point realized that she found what she was searching all around the world, and that was the inner peace. That was God, that was the sparkle and the voice of God inside of herself. And then she realized that God is omnipresent. God is everywhere. In a rock, everywhere, as Jesus said. And then she realized what she missed. She missed the journey, the inner journey. She thought the peace is something you should find outwards, and then you find, you reach it, and then you have it, and then you are satisfied. But she

realized that actually it is not about the destination, as people say, it is about the journey. And it is about everyday dedication. Every day committing to peace. And you do that by being yourself, by being simple, honest, worthy, by being who you truly are. God is already there. Don't worry about God. "Worry" about yourself in that way and then, you will reach God. Because, you don't need to reach anything, that's the trick. You just have to simply realize that God is there. But sometimes we forget about that. And by being truly good people, we remember that and in the remembering is the answer. Remember every day and you will always hear God's voice."

Muse Calliope

"I am Calliope. I am here to tell you something about the angels. They are spiritual beings, ethereal, full of love and light. They live their lives in peace, sometimes in worries, sometimes in sadness, but most of it, they dedicate it to love God and human beings. They are here because of you, humans.

The angels said: "We will protect them, guide them, but we will not mix in their free will." And that is what the trick is. We have to allow angels to come into our lives, to allow them to interfere for the highest good. We need to understand the archangels' and angels' realm. They are there to help us, to guide us, to give us the answers, to lead us on our path. Most in the world they want is to see us happy.

You do not know how an angel or archangel is happy when a person smiles from a soul - when you laugh from the soul. They love that! That laughter is music to their ears!

Do not hesitate to contact them. They are God's beings. They are the "hands of God". Hands that God uses to touch us in a very subtle, gentle and motherly way. They are a kind of spiritual parents, I would say.

Do not hesitate to contact them, do not disbelieve in them. They do not have a way to say: "Hey, I am there, I exist." They need your trust, like God needs your trust. Because you need to trust. That is the answer! They love when you trust God. When you trust, God will do the best for you, when you trust the process, when you trust life. When you trust the processes that you are going through, even when it is not easy.

Because life on Earth is not the easiest place to be. But you chose to come and they are there to support you.

Do not hesitate to contact them. Connect to them. Make them happy, make yourself happy. God loves you all!"

Channeled message from Muse Terpsichore

"I am here to say something about the so-called negative beings, negative entities, and negative people. I do not like the word "negative". Because that is the dualism that exists on the Earth. I would like to say people and entities that are away from God's love by their own choice. That is how I would define them. They need love too, like everything else. When you see a person that is so-called negative, do not judge. Understand. Be full of love. It doesn't need to be that you have to sacrifice for that person or to start to tell your story or to persuade them into something. No, just in peace understand and love that person.

Love finds the way the easiest. It is very fast. Love knows the way. So even if you don't say them "I love you", love went to their soul.

So, love people. Love them completely. And know that there are also so-called negative entities. They didn't find peace. There was a word about peace from Muse Thalia, so there will be a word about peace again. They simply didn't find peace! And when you are not aligned to God, which means you didn't find the peace, you become very angry, very persistent in bad activities and, you try from that anger, you try to find peace by molesting others. That is all they do.

They were not, let's say, born like that. They are simply without peace, without love by their own choice. They do not know how to find the path. So even if you encounter a negative entity, send them to light, to God. They need that very much. If a soul is lost, send them love, pray for them, pray for them to find the light and love. That is what is needed in this world. Both for us and them, so we can live in harmony. There will always be "us" and there will always be "them" but, still we are one in God. Remember that. Duality is there but when you have a prayer, when you have a good intention, you realize that everything is one, through God."

Channeled message from Muse Clio

"I am Clio. The muse that came to talk about your solar system.

You know how blessed you are to have a star called the Sun. It gives you life. It gives you power. It gives you heat. It gives you healing. You should never avoid the Sunlight. It is there for life.

God created everything so perfectly that the Sun is actually our "lamp of life". Be connected to that lamp of life. Say thank you. As much as you need to be connected to the Mother Earth, that was a word about that before, the same you need to be connected to the Sun also. It is a source of life, never forget that. It is full of positive energy for the Earth. If you forget about the Sun, you forget about yourself, about the masculine principle, about who you truly are.

Ego is not bad, ego has to exist, and you just need to know how to control Ego. And you know in astrology what the Sun represents, Ego, I, who I am. Ego in Latin means "I". Solar plexus chakra is the strength is your belly, that is what the Sun "rules". You know the astrology symbols, the astrology meanings and that is true. You have to cherish that very much. It represents who you truly are. And you get that energy from the Sun. The energy that is supporting your true being.

Do not disconnect. Always pray for the light of the Sun, to be with the light, to be on the bright side of life, to be in the light, to be enlightened in a way that is shown who you truly are. That is how you shine. We all shine in a different way but, the Sun in one. And it gives us all that we particularly and differently need. Love that star!"

Channeled message from Muse Melpomene

"I am Melpomene. I will tell you something about art.

What is art? You call many things art: music, films, reading, writing, poems, singing, drawing, and painting. But art is everything, art is everywhere! Art is a way of living, art is uniqueness, art is creation. It is from God. God gave us the possibility to channel the talents, the unique talents we have through so-called art.

How to cherish them? You definitely know how to cherish them if you remember what you actually wanted to become when you grow up as a child. Just remember when you were a child and when people would ask you: "What do you want to be when you grow up?" You knew the answer because you were very close to the Source. And then things came up. Society, needing to fit in, and you forgot about the art, the expressions.

You do not to be a painter to be an artist. You can be an economist and still be an artist if that is your call. But the mission for you in order to be an artist, is to recognize your call and that also lies in your soul and in your solar plexus as well.

Connect, meditate, try new things, be open. And you know how you will know that something is for you? When you feel in peace. So many times we mentioned peace. If you are in peace with a calling, know it is the right path for you.

And you do not need to have one path. You can walk on many paths. You are very creative beings. You are given many talents. God was very generous to you.

We are there to inspire you, but you are there to inspire yourselves. And do that every day. When you make lunch, when you walk, when you drink coffee with friends, when you pray, when you do your work.

Be an artist, be creative. That is how you will always be happy. The happiness lies within art. I am not saying that you should paint every day, but some melody that you hear will move you a bit and then your work is going to be better.

Art is meditation. Art is everything!

Be an artist in this life. Allow yourself to be an artist. That is the thing, allow yourself and you will notice the difference. Your life can be full of colors, from gray to a rainbow, if you allow yourself to be an artist. And know that there are no so-called special people for art. We are all special. Know that!"

Channeled message from Muse Erato

"I am here to talk about the so-called broken hearts. About bad relationships, about sad people, about lost people. About people who suffer for someone. Especially in emotional male and female relationships.

But guess what, it is not sad as you think. It is about soul touching and moving on. You think you lost a part of yourself by being with someone and then you are left by that person. Then you stay sad and you think nothing can lift you up again. I am talking about that state.

But listen, human beings, you have to know one thing. The part of your soul can never be lost. If you "gave" your soul, in a way, you can bring back that part of the soul, by forgiving, by loving, and by letting go of the person who left you in the physical realm.

Know that you are a whole entity always. Always full of love, potentials, and protection from God, from angels, from the spiritual realm.

And try to forgive. They are your lessons, your karmic lessons, debts. That is how life is, that is how life functions. Nothing is forever on this Earth in that way. Even though time doesn't exist in a way that you measure it, nothing lasts forever. So don't be sad.

First, forgive yourself and know that you are good enough. Do not try to estimate yourselves through someone else's eyes. It is always the wrong perception. Look at yourselves through God's eyes and then you will see the divine. And when you see the divine inside of yourself, everything else is less important. And then, it comes to love, forgiveness, understanding and moving on. It sounds easy. Maybe it is not, but it is possible if you truly and deeply want to be healed, sealed, and become a "whole person".

You have to be a whole person in order to meet another whole person. So you form a whole unity of two whole entities that form one unity. That is how you will find your true mate. If you suffer, it is not the path. Just love. First, love yourself, because God loves you. Deeply, truly, completely and unconditionally!"

Channeled message from Muse Urania

"I am Urania. I am here to talk about your ancestors. About the people who are not there with us in the physical realm but they still exist in the spiritual realm.

Some of them are a bit lost; some of them went to the light. Some of them are very high souls and high spirits.

It is not your task to communicate with them or try to be like them. It is about respect!

You have their DNA, you inherited something they were carrying in this world. They might not even have been aware when they were on the Earth plane, that someone after them will look like them, do things like them, suffer because of them. They didn't know. As you do not know that. But you will be someone's ancestor, too. And the matter is about respect.

About knowing who they were, about their talents. Try to find as much as possible. You will get very surprised. Many people have family trees and it is for a good reason. Not to suffer or to stick to the past or history but it is about the learning process. Learning about yourself and respecting who you truly are.

Some of them gave their lives for us. Some of them made very big sacrifices. Some of them did very big things, not knowing it was for us. And everything is for the next generations. So we should all respect that. We should not separate from our families. We usually know our mothers and fathers in so-called regular families. There are also irregularities. But knowing further is knowledge. And knowledge is power. That is true. You found out about that. That is what you should stick to. Everything else passes but you should learn from the past. And teach yourself about yourself. Respect them and know that you will be one day someone's ancestor."

Channeled message from Muse Polyhymnia

"I am Polyhymnia. I want to speak about marriage.

A marriage is considered as a unity of two people who live and share life together. They sign a piece of paper and they go to a temple to make it official. But, I want to say something about the marriage of two souls.

When you marry someone, you, more important than signing a paper, is marrying the soul of a person. How do you do that? You simply open up to that person through God and you love that person in the name of God. That is what you should base your marriage on.

Not based on conditions, jealousy, on "I do this for you, you do this for me", but based on pure love.

God loves us unconditionally and we, we are not God, but we should strive to be like God in that way. That should be our intention when we love.

We learn from higher spiritual beings, how to love if we do not know how. And they, luckily and willingly give us that knowledge in loads. All spiritual beings, have in their interest to teach us how to love another person. And what you should strive for, is to make friends with that person, to be a lover of that person, to be an acquaintance, to be everything possible to that person: support, surprise, the Sun on a rainy day, everything! That is what you should give to your partner, husband or wife.

And that is how you grow together. You grow in that unity and that unity becomes your sanctuary. Your home, your base where you develop other things from the base. If a base is shaken, everything else is shaken. So if you decide to be married and make a base with someone, create a sanctuary and make sure that you are ready to open up your soul to that person.

To understand, to give, to cherish, to support, to be there. Unconditionally! And then you will see what you get in return. Always. It is a law. What you give is what you get. Do not do things in order to get. Do things from love."

Channeled message from Muse Euterpe

"I am Euterpe. I am here to talk about inequality in this world.

You know how many rich people there are. You know how many poor people there are. And how big a difference, how big contrast there is between them. And you say it is an injustice. And you are right to an extent.

But you can't change the state of things deeply and completely. You can't make a so-called paradise on Earth. But there is one thing you can do about poverty, inequality and bad things that are happening here. You can be a microcosmos for yourself. You can feed a cat, you can feed a poor person, you can teach someone a lesson, you can smile at a passerby. Be a little universe and it will spread.

If you all did that, this would be a perfect place for a living. That is what I want you to inspire to do. To love God and do in the name of God, through God good things for others, for humanity. Because you can't live alone on this Earth. We are all connected, we are all some kind of unity. And you, humans, are all brothers and sisters in a way, and you need each other for help.

Maybe you can't go and feed every child that is hungry but if you save one soul, you saved the whole world. Bare that in mind. Be happy, always do that because of love. And you know what, when you do something good, you always feel good. Why? Because that is love. That is God! You did God's job in a way. That is why you feel full of love. You know when you feed someone that is in need, and you feel so full. Your heart is so full, your soul is so full. That's because you did your mission in this world. The mission of God. And that is when you touch God and that is why you grow so much when you do something like that.

So that is good for both sides. That is why we are brothers and sisters, regardless of bloodline. Do not make a difference, do not put labels on people. Look at people's souls with your own soul. That is an ability that you can develop, that you can practice.

If you grew up in a family that you were taught only to see people by their status, standard, profession, you can teach yourself something further. A lesson from God

that everything is "I see your soul, you see my soul." That is how it should be. To see, not with eyes but, with souls. And then we all become better people.

Some of them choose to see with souls, some of them don't. That is free will. But try to be the one who sees with the soul, who acts from the soul and who gives from the soul.

When you give, do not expect something in return. Do not expect, because that is the wrong path, like "I give to get." No, then you are a merchant. And you are not a merchant. Just be a giver.

When you give, you get automatically. And you do not need to know the way how you get something back. But you get. You do not need to get it in the physical realm; your soul got the pleasure of giving. And the pleasure of giving is the most wonderful feeling in the world."
